

A C E N D I O

THE ASSOCIATION FOR COMMON EUROPEAN NURSING DIAGNOSES, INTERVENTIONS AND OUTCOMES

President's Message - July 7, 2021

Prof. Dr. Maria Müller Staub (PhD, EdN, MNS, RN, FEANS)

Dear ACENDIO members

I hope you are fine and looking forward to relaxing holidays. As the shortage of nurses and the Covid-19 problems are ongoing, we thank all nurses for their dedication and wish you the needed energy to keep going after well-deserved vacations. **Nurses really need good working conditions** rather than just the public clapping of hands! While digital and artificial intelligence developments can support nurses work, they never will replace a caring nurse being with the patient and her/his significant others when care is needed.

Today, I'm announcing **news about ongoing activities**. The board now meets online on a monthly basis, which supports the information exchange and collaboration of workgroups and projects. Based on ACENDIO's mission and the new boards' visions, we are updating the **Strategic Plan** and **ACENDIO Organogram**; and we now publish the board meeting minutes for your information at: <https://acendio.net/news/board-meetings/>
Also the draft **minutes of the last General Assembly** (GA) are open for your review and will be presented for your acceptance at the next GA: <https://acendio.net/general-assembly/>

I'm happy and proud that individual and institutional membership numbers are growing! We also have fruitful collaborations with Universities and Nurses Associations. For more information and networking go to: <https://acendio.net/>

The **Public Relations Committee** was renewed and is led by our webmaster Bente Christensen, who updates the website to keep you posted. Valentina Zeffiro is the new chair of **ACENDIO's Research Committee**, and you find information on the **newest research grant winners** along with the **report** of the former winners at: <https://acendio.net/research-network-award/>

A **new research grant** will be announced this fall, so keep tracing this site!

The **eHealth Workgroups** go on with their work. Mikko Härkönen leads eHealth Workgroup 1, and together with Bente Christensen and Fabio D'Agostino the group creates '**Practical Implementation Principles' on what, how and why to implement SNL's into practice**. If you are interested to join this group, write to mikko.harkonen@thl.fi no later than August 30, 2021.

eHealth Workgroup 2 is led by Helen de Graaf-Waar, and together with Sergio Barrientos-Trigo, Claudia Leoni-Scheiber and Valentina Zeffiro the group creates '**Practical Implementation Principles' on teaching SNLs** (what, how and why) in education, and on how to implement SNLs into curricula. Since the last conference, several ACENDIO members joined this group. For more information contact helendegraaf@stichtingvdir.nl

Join us to discuss these Implementation Principles at the **eHealth Workshop on April 21, 2022 in St. Pölten, Austria**. Download the **Save the date**: <https://acendio.net/workshop/>

The last **conferences' app is open** until the next month. Take the advantage to **chat with authors** and to download presentations. The **video on "Improving patient outcomes through SNLs"** is available at: https://acendio.net/wp-content/uploads/2021/04/Keynote_Mueller-Staub.mp4

Last but not least, save this date: **14th ACENDIO Conference, March 16-18, 2023**

Kind regards and have a great summer

Maria Müller Staub
ACENDIO President
