**Candidate**

Title: PhD, MSN, RN  
Name, First Name: Mariangela Vanalli  
Function: Project Management Office (PMO) in Digital Health e Project Manager  
Healthcare Consultant  
Institution: EY Advisory S.p.A.  
City + Country: **Milan Italy**

**Nominated for Position: Board Member**

**Nominated by: Fabio D'Agostino**  
**Seconded by: Valentina Zeffiro**

**Motivation statement (max. ½ page)**

After obtaining my PhD in public health, I dedicated myself to analyse data from digital medical records. All this was done using artificial intelligence, deep learning and natural language processing. I have always worked in the field of healthcare digitalization, also carrying out training courses in the academic and for clinicians. Management activities regarding the implementation of clinical processes, with the definition of dataset for the electronic medical record of Nuvyta-NuPlatform, according to HL7 v.2.5 messaging (Mapping FHIR with HL7 Conformance Profile) and the management of European projects, such as INTERREG, Erasmus Plus IN-ICT-CARE and telemedicine, HORIZON. Representative of the company quality process, regarding the ISO9001 requirements, for the following areas: staff selection and hiring, training, sales, purchasing management, supplier qualification and delivery. Collaborations in regional projects on the validation of digital systems in the hospitals of Lombardy Region. As my CV points out, I have managed several regional, european, national projects, in the health sectors both at managerial and academic level. Knowledge of the organization of the National Health Service, thanks to collaborations at the regional level and in reference to my previous work experience in the clinical, health, social welfare, training, university, research and managerial context. I am applying to be able to implement or propose projects in the field of healthcare digitization and the application of encodings with standard nursing languages. All this is essential to create collaborations with other professional figures such as engineers and to enhance cross-competences. If in case I am elected, for the Acendio I would like to be able to plan training courses with the creation of final project work, allowing nurses to work with engineers. Other projects that should be created concern the use of telemedicine and teleassistance using nursing languages to standardize diagnoses, applicable in health organizational models at territorial level.
