A C E N D I O

THE ASSOCIATION FOR COMMON EUROPEAN NURSING DIAGNOSES, INTERVENTIONS AND OUTCOMES

2025 GA report eHealth Working group Education Year 2024

Chair: Helen de Graaf-Waar
Members: Claudia Leoni-Scheiber, Valentina Zeffiro, Maja Klancnik

During the biennium 2023-2025 the working group continued work on the tasks as stated in the aim in the biennium 2019-2021:

- Title: Facilitating participation and education incl. patient education.
- **Aim**: Education content of this workgroup is based on the ACENDIO constitution and on *Position Statements 4+5.*
- The **product** of this working group is to create a '**Practical Implementation Principles'** on teaching SNLs and eHealth in education (what, how and why).

2022: Working towards St Polten workshop in April 2022 the working group created examples of educational factsheets and prepared a workshop to continue work on practical factsheets with the assistance of ACENDIO members. New fact sheets were added and all were reviewed and finalized afterwards.
2023: Seven of these factsheets were used in a workshop session during the Rome conference 2023. Attendees were asked to discuss *how the usability and effectiveness of these educational interventions can be evaluated*. At the tables attendees either suggested *outcome criteria, measurement instruments and a methodology or research design*.
2024: On request the St Polten workshop was repeated during the Oslo event April 2024 and in excerpts from a NANDA-I network group meeting at the Deggendorf Institute of Technology, Germany. This resulted in 2 more topics and valuable input for the existing factsheets.

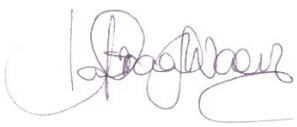
During all sessions the input of nursing professors, researchers, nursing students, and practicing nurses, and especially the discussions between attendees with different backgrounds or from different countries, was considered very valuable. Each time results resulted in several brown papers filled with inspiring ideas for education on clinical reasoning and nursing diagnostics.
Experiencing the inspiring discussions during these workshops the working group decided to develop a template for ACENDIO members to organize similar sessions with stakeholders in educational developments, for example educators, researchers, and students.

Products:

- Workshop template, including material
- Frontal teaching: Lecture
- Problem based learning: To PESS
- Case-studies: Guided clinical reasoning
- E-learning methods: Serious gaming
- Transfer tasks: Nursing theories in practice
- Concept mapping: Case-concept map
- Case project
- Escape room for clinical decision-making

The working group concluded that the above-mentioned products can be finalized and published at ACENDIO's website for use by members. Consequently, the working group requests the General Assembly to be disbanded to make room for other developments.

Respectfully submitted, February 2025



Helen de Graaf-Waar, Chair eHealth working group Education
